Chennai, India, +91-9500675292

Been coding ever since I got fascinated by computers. I love diving deep into programming languages. C, C++, Java, Python, Javascript, Ruby, Clojure. Hope to become a core contributor for a language someday.

Experience

Co Founder at Goodshows

January 2016 - Present (6 months)

Discover Movies & TV Shows with Friends

"Goodshows is like Goodreads but for movies and TV shows" -AppAdvice.

As a Co-Founder, I developed the backend of the application, managed social media profiles and handled press and user communications.

Backend Developer at Crowdfire

November 2014 - December 2015 (1 year 2 months)

Here I was a part of small team that handled authentication and payment module.

Backend Developer at Zoho Corporation

February 2014 - October 2014 (9 months)

Helped initiate the project from scratch along with a team member by writing the APIs and data model for Zoho Notebook which is a new product that is part of Zoho Office Suite(not to be confused with existing product with same name).

Android Application Developer at Zoho Corporation

June 2013 - January 2014 (8 months)

Developed the android application for Zoho Vault which is one of the applications in Zoho Suite of Web applications. Also developed an intra team contact management android application.

Education

Sri Sivasubramaniya Nadar College Of Engineering, Chennai,

Bachelor's Degree, Computer Science, 2009 - 2013

Grade: 7.5

Projects

Sprint - Chrome Plugin For Productivity

October 2014 to Present

Made a small chrome extension that blocks the listed sites for specified duration.

<https://chrome.google.com/webstore/detail/blocksites-sprint/iidaiejaaahookpphknelkmdhncolldg?hl=en>

PryState

July 2015 to Present

Made a gem in Ruby that prints the state of the program while debugging.

<https://github.com/SudhagarS/pry-state>

Lackdesk

Oct 2015 to Feb 2016

Created a tool that helps companies do customer support directly from Slack.

Dpr - Simplest Ruby HTTP Client

March 2016 to Present

Dpr is the simplest Ruby Http client. It lets you do HTTP directly on URL strings. If you want to do HTTP really fast without much setup or hassle in a pry or IRB session, then Dpr is what you need.

Whileaway

April 2016 to Present

Never miss a tweet from your favorite tweeters. Whileaway is a better version of Twitter's 'while you were away' that puts users first and provides a better experience in consuming tweets.
